### WHAT IS 'QUICKFACTS?'

QUICKFACTS is a very simple, visual tour through the paper process. It starts with the basics, fibres and chemicals, and ends with the sheet being reeled.

The concept is simplicity, one fact or idea per QUICKFACT sheet. The user will be able to follow the sequence logically on line via hyperlinks, or print them out to make a comprehensive glossary of papermaking.

### NOTES

If you are a supplier and would like a link to your site, then we have space for up to 10 such links in the gray box to the right, below the picture.

Currently there is no charge for such links.

If you wish to have your logo displayed, or for sponsorship of any page, or group of pages, then please send your request to the email address given at the bottom of the page.
